

Basics of Taxonomy 2022

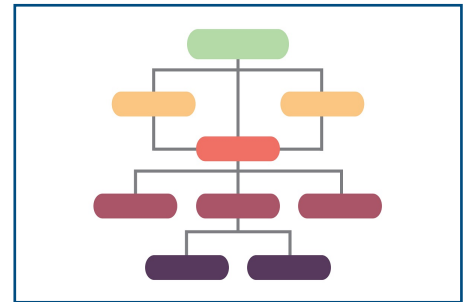

The **deadline day** for applying to this course is **August 29th, 2022**
Find the registration form at at the following link: <https://bit.ly/3AeulDK>

Description

The course is structured in a sequence of five interlinked modules. Each module will start with an introductory lecture of approx. 1-3 hours. Then the remaining part of each module is typically divided between a short demonstration of a topic in order for the students to practise it, while next consecutive part starts with introduction and continues with “hands-on” working and exercises. The participants are also expected to give a short informal presentation (power point, 10 min plus 5 min questions) of their work and future plans for each other during the first four evenings of the course.

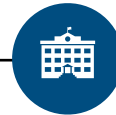

Modules:

- 1) Scientific illustration
- 2) e-Taxonomy and biodiversity informatics tools
- 3) Digital drawing
 - 3.5) Stacking photography
- 4) DELTA (Description Language for Taxonomy)
- 5) Scientific writing and communication
