CYBERSECURITY

Commitment to collective digital security

CETAF statement on Cybersecurity: Commitment to collective digital security

CETAF recognises the critical vulnerability of our digital infrastructure to cyberattacks, which threaten scientific data, collections, and the trust placed in our institutions. We commit to a unified approach to digital defence and security.

CORE RESPONSIBILITY:

Member institutions share responsibility for implementing effective cybersecurity systems and developing up-to-date crisis protocols to ensure swift, effective responses to attacks.

NATIONAL SUPPORT:

We formally call on national governments to provide dedicated support to our institutions in the fight against cybercrime, helping safeguard our shared scientific heritage and data.

DATA PRESERVATION:

We affirm that protecting scientific data and digital collections is essential to preserving our shared heritage and upholding scientific integrity.
