

e.pulse #6 TETTRIs special issue

Sept23 / the digital newsletter of the european taxonomists

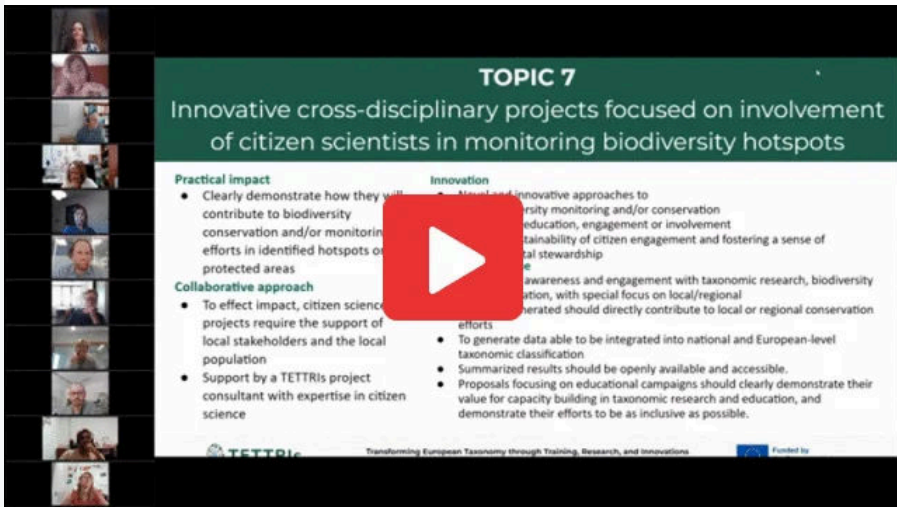

**READ THE CALL SCOPE AND ACCESS
TO THE WHOLE DOCUMENTATION**

TETTRIS CALL WILL CLOSE THE 30TH OF SEPTEMBER

**Last days for applying to our call:
transform Taxonomy and be funded!**

Access all the information here

TOPIC 7

Innovative cross-disciplinary projects focused on involvement of citizen scientists in monitoring biodiversity hotspots

Practical impact

- Clearly demonstrate how they will contribute to biodiversity conservation and/or monitoring efforts in identified hotspots or protected areas

Collaborative approach

- To effect impact, citizen science projects require the support of local stakeholders and the local population
- Support by a TETTRis project consultant with expertise in citizen science

Innovation

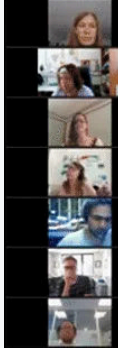

- Develop innovative approaches to biodiversity monitoring and/or conservation education, engagement or involvement
- Ensure sustainability of citizen engagement and fostering a sense of stewardship
- Develop awareness and engagement with taxonomic research, biodiversity education, with special focus on local/regional conservation efforts generated should directly contribute to local or regional conservation efforts
- To generate data able to be integrated into national and European-level taxonomic classification
- Summarized results should be openly available and accessible.
- Proposals focusing on educational campaigns should clearly demonstrate their value for capacity building in taxonomic research and education, and demonstrate their efforts to be as inclusive as possible.
